WORK EXPERIENCE

Postdoctoral Researcher

Computational Statistics and Machine Learning, Department of Computer Science, University of Oxford, 2023.04 -

Research Internship

Social Computing Lab, Microsoft Research Asia, 2021.10 - 2022.03, worked on deep contextual bandits for news recommendation.

Academic Tutor

RESEARCH INTERESTS

My research interests are online experimental design in machine learning, including multi-armed bandits and active learning. I work on both theoretical and practical views of experimental design with two goals: (I) Designing robust algorithms to reflect the preference of agents and understanding the concentration of measures and adaptive strategies involved. (II) Designing the pipeline and recommendation strategies for synthetic biology experimental design applications.
